1. TO CREATE KANBAN BOARDS

AIM: To create a Kanban Board with *To Do, In-Progress, and Done* columns and simulate task movement.

Procedure:
Step 1: Open Jira

- Open Google Chrome.
- In the address bar, type: https://www.atlassian.com/software/jira
- Press Enter.
- Click Sign In.
- Enter your Atlassian email and password.
- Click Log In.
- Click go to JIRA

Step 2: Open Jira Software
After logging in,

- You will be redirected to the Jira dashboard.
- If prompted, select your organization/workspace.
- Wait until the Jira home page loads.

Step 3: Create a New Kanban Board

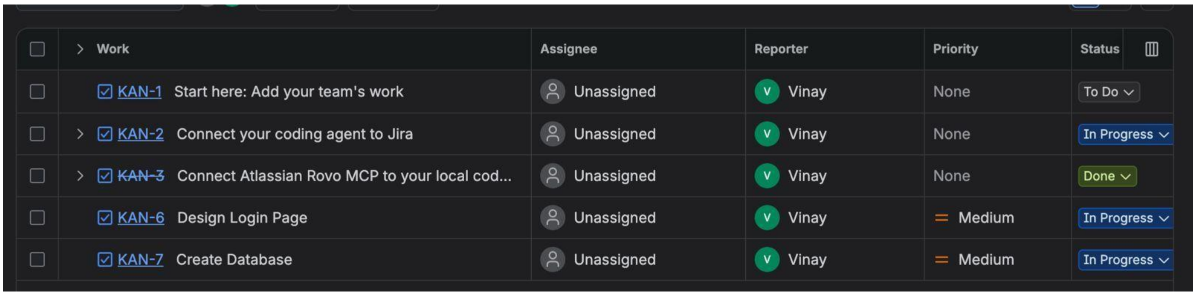
- From the Jira home page, locate the **Spaces** section in the left navigation panel.
- Click the **+ (Plus)** icon next to **Spaces**.
- A menu will appear with different options.
- Select **Kanban Board** from the available board types.

Step 4: Select Kanban Board

- After selecting **Kanban Board**, the board creation page opens.
- Verify that **Kanban Board** is selected.
- Click **Use Template** (or **Continue**, depending on your Jira version).

Step 5: Enter Board Details
Fill in the required details.
Space Name
Project Management (or any name required by Jira)
How your space is managed
Team-managed/ Company-Managed according to your use case **Screenshot 5:**
Entering Board Details and click next
Click next and wait for a while and your space will be ready
STEP 7: KANBAN BOARD
The Kanban board opens automatically. You
should see three columns:

- To Do
- In Progress
- Done



Work		Assignee	Reporter	Priority	Status
KAN-1	Start here: Add your team's work	Unassigned	Vinay	None	To Do
KAN-2	Connect your coding agent to Jira	Unassigned	Vinay	None	In Progress
~~KAN-3~~	Connect Atlassian Rovo MCP to your local cod...	Unassigned	Vinay	None	Done
KAN-6	Design Login Page	Unassigned	Vinay	Medium	In Progress
KAN-7	Create Database	Unassigned	Vinay	Medium	In Progress

OUTPUT:

Thus, a Kanban board was successfully created using Jira/Trello and tasks were moved across columns to simulate workflow

2. SCRUM PROJECT

AIM: To create a Scrum project in Jira, add backlog items, prioritize them, create a sprint, start the sprint, and track progress using the sprint board.

Procedure

Step 1: Open Jira

- Open Google Chrome.
- In the address bar, type: **https://www.atlassian.com/software/jira**
- Press **Enter**.
- Click **Sign In**.
- Enter your Atlassian email and password.
- Click **Log In**.
- Click **Go to Jira**.

Step 2: Open Jira Software

- After logging in, you will be redirected to the Jira dashboard.
- If prompted, select your organization/workspace.
- Wait until the Jira home page loads.

Step 3: Create a Scrum Project

- Click **Projects** from the left navigation panel.
- Click **Create Project**.
- Select **Scrum** as the project template.
- Click **Use Template**.

Step 4: Configure the Project

- Enter the **Project Name** (e.g., *Library Management System*).
- Choose **Team-managed** or **Company-managed** project.
- Enter the project key if required.
- Click **Create**.

Step 5: Add Backlog Items

- Open the **Backlog** tab.
- Click **Create Issue**.
- Enter user stories/tasks such as:
    - Add Books
    - Search Books
    - Issue Books
    - Return Books
    - Generate Reports
- Save each backlog item.

Step 6: Prioritize the Backlog

- Drag and drop backlog items to arrange their priority.
- Place the highest-priority items at the top.

Step 7: Create a Sprint

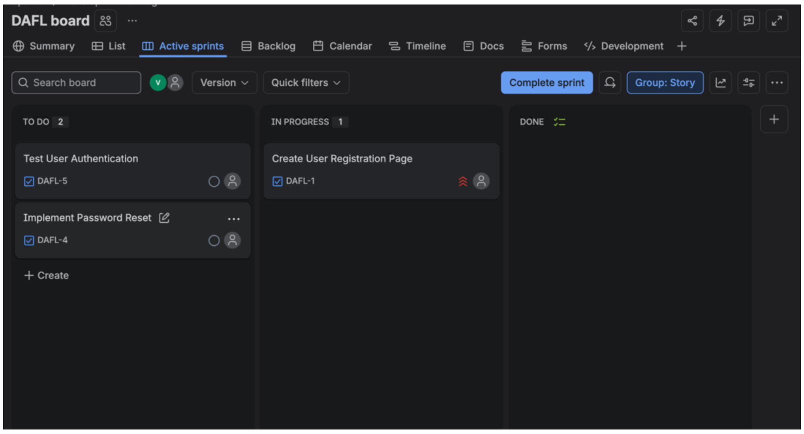
- Click **Create Sprint**.
- Move the required backlog items into the sprint.
- Name the sprint if required.

Step 8: Start the Sprint

- Click **Start Sprint**.
- Enter the sprint duration and goal.
- Click **Start**.

Step 9: Track Sprint Progress

- Open the **Active Sprint Board**.



OUTPUT: Thus, a Scrum project was successfully created in Jira with backlog prioritization, sprint planning, sprint execution, and sprint completion

3. SCRUM PROJECT

AIM: To create a Scrum project in Jira, add backlog items, prioritize them, create a sprint, start the sprint, and track progress using the sprint board for Library Management System.

Procedure

Step 1: Open Jira

- Open Google Chrome.
- Visit https://www.atlassian.com/software/jira.
- Sign in using your Atlassian account.
- Click **Go to Jira**.

Step 2: Create a Scrum Project

- Click **Projects** → **Create Project**.
- Select **Scrum**.
- Click **Use Template**.

Step 3: Enter Project Details

- Project Name: **Library Management System**
- Project Type: **Software**
- Project Management: **Team-managed**

- Click **Create**.

Step 4: Add Library Management Backlog

Create the following user stories:

- Add New Book
- Search Book
- Issue Book
- Return Book
- Manage Members
- Generate Reports

Step 5: Prioritize Backlog

Arrange the backlog in order of importance:

1. Add New Book
2. Search Book
3. Issue Book
4. Return Book
5. Manage Members
6. Generate Reports

Step 6: Create Sprint

- Click **Create Sprint**.
- Move the prioritized stories into Sprint 1.

Step 7: Start Sprint

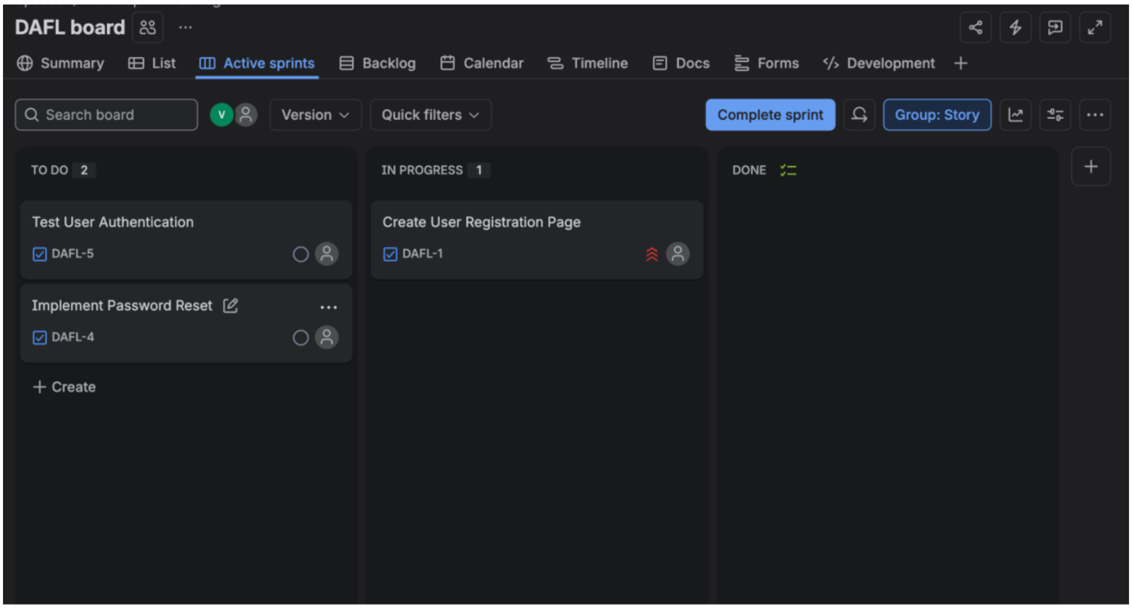
- Click **Start Sprint**.
- Set sprint duration.
- Enter Sprint Goal:
  Develop the core Library Management features.
- Click **Start**.

Step 8: Update Sprint Board

Move completed tasks across:

- **To Do**

- **In Progress**
- **Done**



OUTPUT: Thus, a Scrum project was successfully created in Jira with backlog prioritization, sprint planning, sprint execution, and sprint completion for library management System.

4. MoSCoW s Kano techniques

AIM: To categorize and prioritize Online Learning Platform requirements using **MoSCoW** and **Kano techniques** in Jira.

Procedure

Step 1: Open Jira

- Open Google Chrome.
- Go to https://www.atlassian.com/software/jira.
- Sign in and open Jira.

Step 2: Create a Project

- Click **Projects**.

- Select **Create Project**.
- Choose **Task Management** or **Scrum** template.
- Click **Create**.

Step 3: Create User Stories

Add requirements such as:

- User Registration
- Login
- Course Enrollment
- Video Lectures
- Online Quiz
- Certificate Download
- Live Classes
- Discussion Forum

Step 4: Apply MoSCoW Prioritization

Categorize the requirements:

Must Have

- Login
- Registration
- Course Enrollment

Should Have

- Video Lectures
- Online Quiz

Could Have

- Discussion Forum
- Progress Tracking

Won't Have

- AI Tutor
- VR Classroom

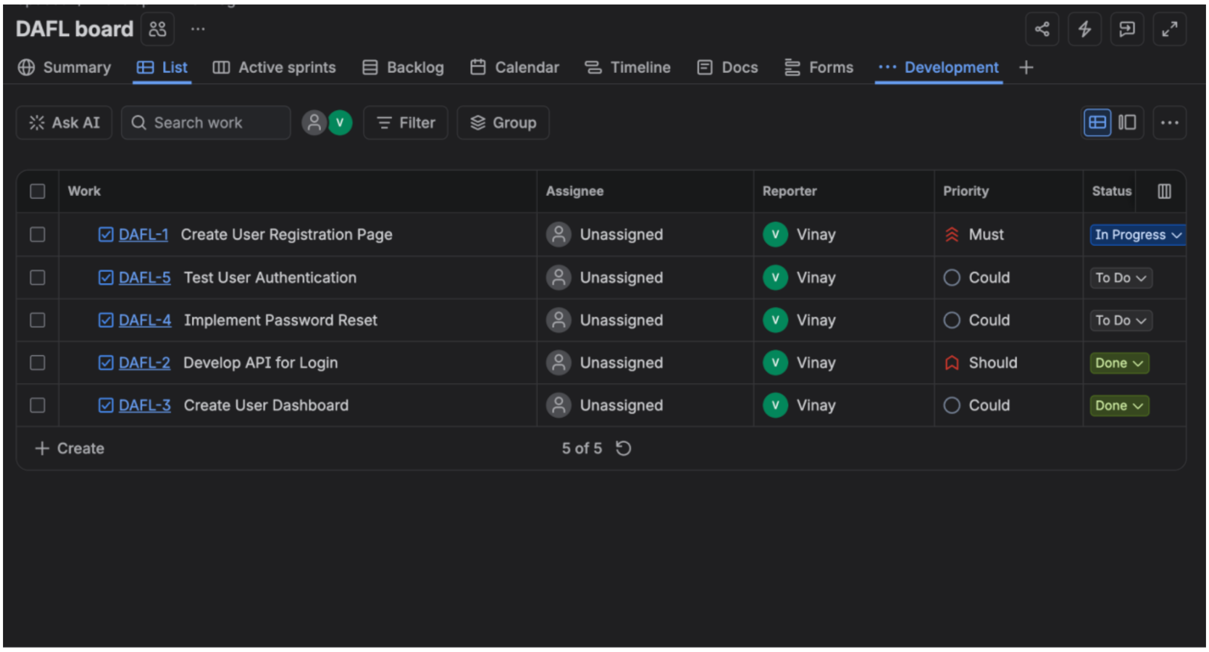
Step 5: Apply Kano Classification

Classify requirements:

- **Basic Needs:** Login, Registration
- **Performance Needs:** Video Lectures, Online Quiz
- **Excitement Needs:** AI Tutor, Personalized Recommendations

Step 6: Save and Review

- Save all issues.
- Review the prioritization with the project team.

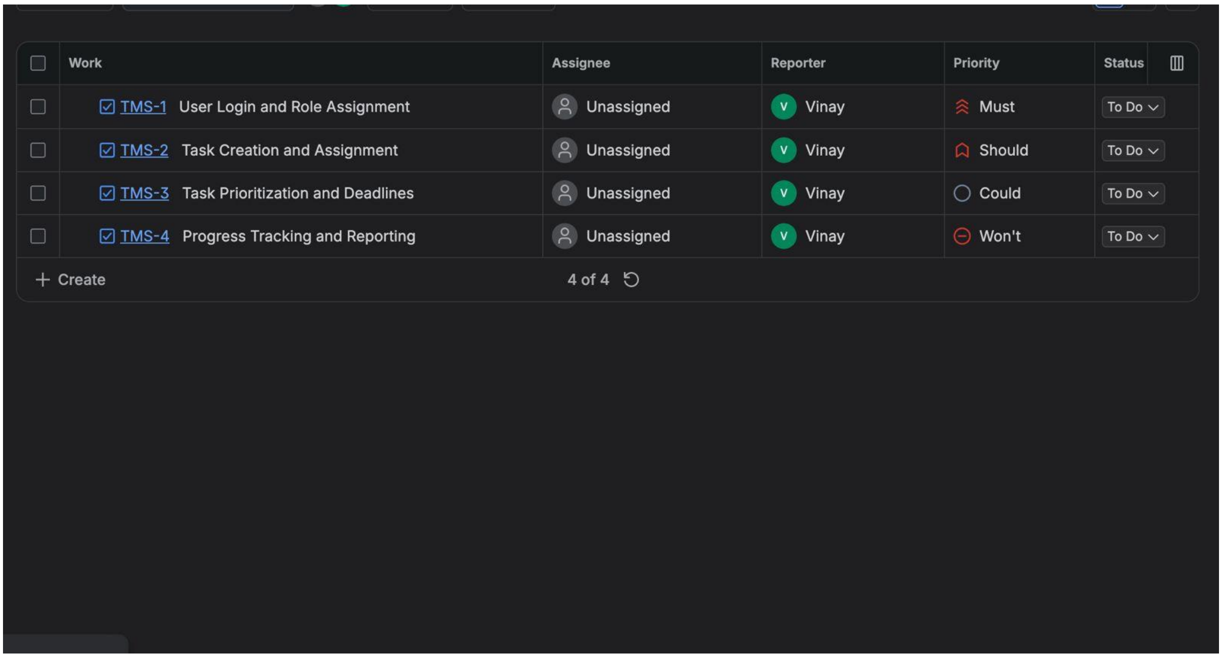


OUTPUT: The Online Learning Platform requirements were successfully categorized and prioritized using MoSCoW and Kano techniques in Jira.

5. MoSCoW s Kano techniques

AIM: To categorize and prioritize Task Management System requirements using **MoSCoW** and **Kano techniques** in Jira.

Procedure:



OUTPUT: The Online Learning Platform requirements were successfully categorized and prioritized using MoSCoW and Kano techniques in Jira.
